

# KX-UT113

## **Panasonic KX-UT113B SIP Phone**

The **Panasonic KX-UT113B** is a PoE enabled SIP deskphone offering Wideband audio and 2 SIP accounts. The large 242x55 pixel LCD is large enough to see critical user applications and makes this phone easy to use and install. The KX-UT113B offers 100 personal phonebook entries with up to 5 numbers for each entry. At an attractive price point, the Panasonic KX-UT113B is a fantastic entry-level phone for most office environments.

## **Panasonic KX-UT113B Overview**

The UT Series features wide-band, high-definition voice for crisp, precise sound quality whether delivered via the handset, speakerphone or optional headset. An Echo Cancellation feature combined with an expanded acoustic chamber further enhances sound quality. All phones in the series feature wideband-compliant, hearing aid compatible handsets along with built-in, high-quality speakers and microphones.

Connecting UT Series phones to select, hosted services opens the door to integration with a number of applications. Customer-facing employees in sales or other service functions can then utilize compatible desktop and web-based call-control applications and service-enhanced features, leading to better, more efficient customer service.

Like all phones in the Panasonic SIP lineup, the UT Series is currently certified on BroadSoft® BroadWorks® and Digium® Asterisk® platforms. Panasonic SIP phones are a proven, cost-effective endpoint solution for small to mid-size companies utilizing the latest in Hosted and Open Source PBX technology.

The UT Series is designed to complement your existing communications infrastructure, yielding a low TCO and maximizing ROI. Select models feature a second data port, so you can connect a second device to the network without the time and expense of running additional Ethernet cable. All UT Series models are PoE ready, so you won't need an electrical supply thus eliminating adaptors or electricians' fees. An energy-saving Eco mode feature lets you lower power consumption while a powerful, two-year limited warranty protects your investment well into the life of the phone.
