Data Port

INTEGRATED TELEPHONE SYSTEM

Outstanding Features with Built-In Quality

Hands-Free Speakerphone

Built-in speakerphone allows for hands-free operation. You can answer a call without the handset or let others in the room join in your conversations.

Data Port

A second jack on the back of the phone allows you to connect a computer, modem, fax machine, answering machine or other single line device.

30-Station One-Touch/Speed Dialer

20 one-touch dialing buttons are ideal for storing emergency or frequently-dialed numbers. You can also store and retrieve 10 phone numbers for 2-step speed dialing. A total of 30 stations will save you time when searching for, and dialing numbers.

Dial Lock

Dial Lock

Using a numerical code you can lock (and unlock) the dialing keypad. Outgoing calls can not be dialed, while Incoming calls can be answered.

Headset Jack

HEADSET-READY

Enables you to connect an optional headset to the unit for hands-free conversations.

Auto Redial

Redials the last number called. If the line is busy, the unit automatically disconnects the call and then redials the number repeatedly at regular intervals. This is especially convenient when you have an important call to make to a busy number.

Additional Features

- Call Restriction
- Mute
- Auto Pause
- Electronic Volume Control
