

Telephone KX-TG6811

Features

Noise Reduction

Reduce the background noise of the other party

When the area around the other party is noisy and it is difficult to hear, you can reduce the surrounding noise to make the speaker's voice easier to hear just by pressing the dedicated button.

Smart Function Key

Easy access to necessary functions

The Smart Function Key flashes according to the situation. By pressing this key while it is flashing, you can respond to a call.

With the slow flashing NR key,

- View the caller list when there are missed calls if there was a call while you were away.

With the fast flashing NR key,

- Answer the call on speakerphone.
- Stop the alarm sound (then switches it to snooze mode).
- Enable Noise Reduction during a call.

Power Back-Up Operation

You can even use the phone during a power failure

During an electric power failure, you can supply the power stored in your handset to the base unit, so you can make calls for a certain period of time even when the power is out.

Key Finder Compatible

The handset detects lost items

Simply attach the Key Finder to items that you often misplace, and use the handset to find them quickly and easily. You can see roughly how close you are to your lost item on the LCD screen, and both the handset and Key Finder beep when being searched for, making them easy to find. You can add up to four Key Finders (sold separately).

* The optional Key Finder KX-TGA20 is required.
