

Telephone KX-TG7861

Features

- Convenience
- Caller ID

Customized Sound System (Equalizer)

Lets you comfortably hear the caller's voice form the handset .

The sound volume of each frequency band can be adjusted. Users can select from three different types of sounds according to their hearing. This lets you adjust the sound of the other party's voice for easy listening.

Key Finder Compatible

The handset detects lost items

Simply attach the Key Finder to items that you often misplace, and use the handset to find them quickly and easily. You can see roughly how close you are to your lost item on the LCD screen, and both the handset and Key Finder beep when being searched for, making them easy to find. You can add up to four Key Finders (sold separately).

* The optional Key Finder KX-TGA20 is required.

1.45-inch TFT Colour LCD

The TFT LCD displays both text and colour images with higher clarity and visibility than conventional displays. GUI-like icon-based menu screen makes it easy to access different functions and settings.

Noise Reduction

Reduce the background noise of the other party

When the area around the other party is noisy and it is difficult to hear, you can reduce the surrounding noise to make the speaker's voice easier to hear just by pressing the dedicated button.
